

# Coursework submission guidelines: Web Development

For the submission of your CA first make sure that your application is accessible via the following url:  
<http://students.emps.ex.ac.uk/<username>/index.php>.

In addition, you need to submit all the source files through Harrison E-Submit (<http://empslocal.ex.ac.uk/cgi-bin/submit/prepare>). Please do not include the database, however, and instead provide a dedicated folder “database” which contains all the scripts to create the necessary database tables. This can be either in the form of SQL scripts or PHP scripts which execute SQL.

Upon successful upload, the system will generate an “E-Submit receipt”. To complete your submission, you will need to print your E-Submit receipt and hand it in along with your BART cover sheet at the Info Point desk before 12pm on the date of the deadline. (For guidance on the BART system and printing your cover sheet, please see BART guidelines).

I wish you all the best for preparing your continuous assessment,

Diego
